

Alux super light forged alloy wheels

Jost new product launch

Jost South Africa has launched their new range of Alux forged aluminium rims.

- 3rd biggest manufacturer globally
- Warranty 5 years
- TÜV approved
- Very high corrosion resistance
- 5 x stronger than steel rims
- Increased payload
- Lower fuel consumption
- Increased tyre life
- OEM approved supplier

Alux use a large rim horn design which is crucial to reduce wear damage caused by friction between the rim and the tyre bead. This also ensures a high sealing contact surface with the tyre to reduce tyre pressure loss.

Comparative forged rim horn design

Alux rim horn design
